

Transit Video Surveillance Upgrade Project

Questions and Answers

August 31, 2021

- 1) Are you open to a Cloud-Based Video Surveillance system?

Yes

- 2) If we were to connect to power would we have to compensate for the use of power?

No, the County or Caltrans is responsible for power at the sties.

- 3) Is there an internet connection at the Ops Center and if so what kind is there?

We have Comcast Business 600. Recent speed test revealed 200 Mbps download and 40 Mbps upload speed.

- 4) What is your data retention policy?

Yuba-Sutter Transit does not have an official data retention policy. However, for this project video from a park & ride lot should be available for viewing for 30 days. Incidents should have the option to be downloaded and stored locally or have the option to be stored on the cloud for up to 3 years.

- 5) Are you providing us sim cards and data plans or would we have to provide them for ourselves?

Yuba-Sutter Transit will provide successful contracted with the necessary number of unlimited data SIM cards from T-Mobile.
